

**A REPORT ABOUT FOOD CENTERS IN
MAKERERE UNIVERSITY**

segawa david bisaso 14/u/1115 214001060

1 BACKGROUND

Makerere University is the biggest and leading university in Uganda and East Africa at large. It is being attended to by the biggest number of university students in Uganda. The problem comes in with feeding this high number of students. The five halls of residents that is to say Lumumba, Mary Stuart, Livingstone, Complex, Africa, Nkrumah, Nsibirwa and University hall only provide free food to the government sponsored students. The private students who are more than the government sponsored have to buy which is not favoring them at all. The food also provided to these students is again of low quality. There are also other private food centers or restaurants which take the initiative of providing food to the university students at a given a price. My research is going to focus on the quality of provided, distances students have to walk, prices, the customer care services and time of delivery of food to the students of these restaurants.

2 OBJECTIVES

- To find out whether the distances students move to reach these food centers are favorable or not.
- To investigate the quality of food students take while they are at these food centers.
- To check whether the food prices of these restaurants fit within students affordability.
- To find out the customer care services at these food centers.
- To find out whether the time of delivery of food to students doesnt interfere with their lectures.

3 METHODOLOGY

3.1 Research Questions

- Name the food center or restaurant.
- What is the location of the food center?
- Describe the menu of the food center with a video
- What are some of the dishes served out at this food center?
- What are some of the dishes served out at this food center?

3.2 Sample

The sample size for this research problem covered only Makerere and the offshore restaurant at the college of science and informatics technology was used to get the required data.

3.3 Data Analysis

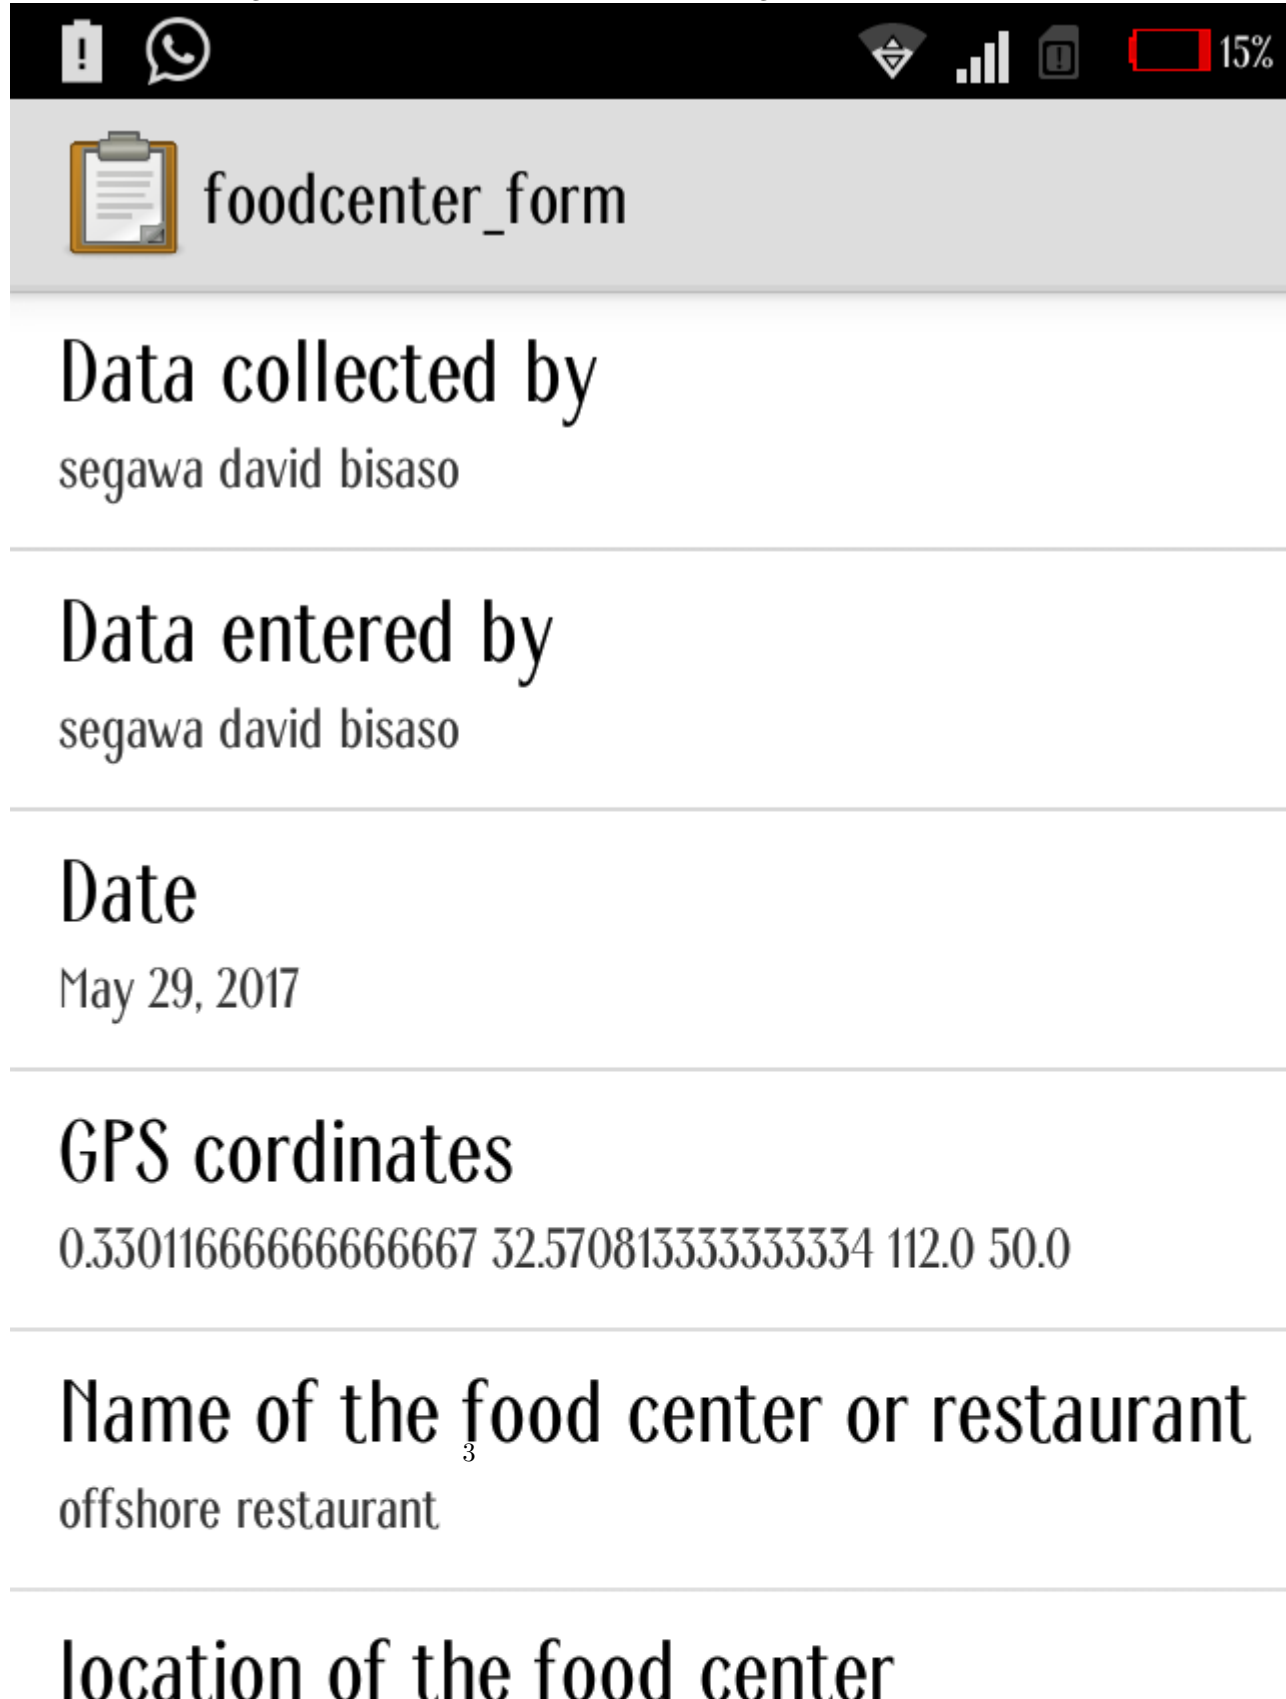

Data was entered using (ODK) Open Data kit software and analysis of the data was done using aggregate software.

3.4 Limitations

- The beneficiaries were not willing and ready to give accurate information
- The sample size was too small to give enough information
- Time and finances were not enough

3.5 OUTCOMES

A screen shot showing one the forms filled with research data using ODK collect.

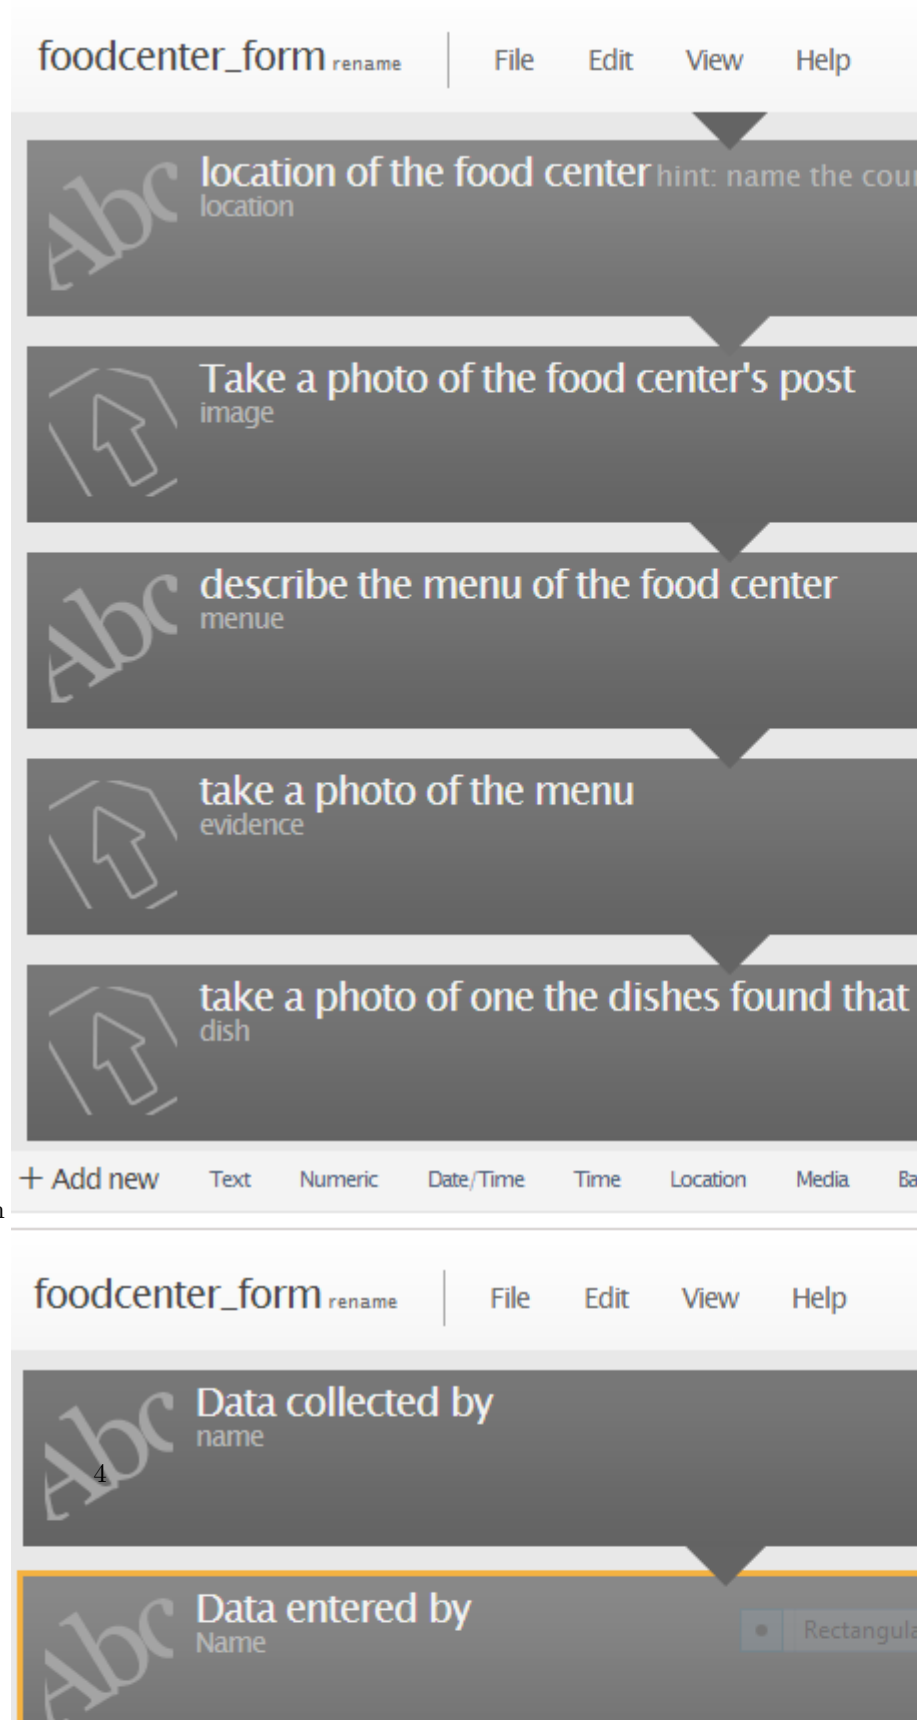

The screenshot shows a mobile application interface for ODK Collect. At the top, there is a black status bar with icons for a warning, WhatsApp, signal strength, and battery level (15%). Below this is a grey header bar with a clipboard icon and the text 'foodcenter_form'. The form content is divided into sections by horizontal lines. The first section is titled 'Data collected by' and contains the text 'segawa david bisaso'. The second section is titled 'Data entered by' and also contains 'segawa david bisaso'. The third section is titled 'Date' and contains 'May 29, 2017'. The fourth section is titled 'GPS cordinates' (note the spelling) and contains the coordinates '0.3301166666666667 32.570813333333334 112.0 50.0'. The fifth section is titled 'Name of the food center or restaurant' and contains 'offshore restaurant'. The sixth section is titled 'location of the food center'.

Data collected by	segawa david bisaso
Data entered by	segawa david bisaso
Date	May 29, 2017
GPS cordinates	0.3301166666666667 32.570813333333334 112.0 50.0
Name of the food center or restaurant	offshore restaurant
location of the food center	

4 APPENDICES

A snapshot of page 1 of the form

foodcenter_form rename | File Edit View Help

location of the food center hint: name the court location

Take a photo of the food center's post image

describe the menu of the food center menue

take a photo of the menu evidence

take a photo of one the dishes found that dish

+ Add new Text Numeric Date/Time Time Location Media Ba
